PREFACE

The CATALOG OF COPYRIGHT ENTRIES is published by authority of sections 210 and 211 of Title 17 of the *United States Code*. Section 210 provides in part: "The current catalog of copyright entries and the index volumes herein provided for shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

Each annual volume is subdivided to represent the classes of material listed in section 5 of Title 17 of the *United States Code*. The table at the end of this preface shows the organization of the *Catalog*, together with a brief listing of the materials principally contained in each part, the symbols used to distinguish the materials, and the prices of semiannual issues and of the annual subscription to the complete *Catalog*.

Each copyright registration listed in the *Catalog* is recorded in a main entry, which includes a description of the work copyrighted and data relating to the copyright claim (the name of the copyright claimant, the copyright date, the copyright registration number, etc.). Cross-references, and, in some cases, indexes, are provided.

The name of the copyright claimant in each entry is that given in the application for registration. Available information in the records of the Copyright Office relating to subsequent changes of ownership can be obtained upon request and upon payment to the Register of Copyrights of the fee specified in the law for the conduct of a search of the records.

In the case of each registration listed, except for renewals, the deposit of a copy (or copies) of the work has been made in accordance with the provisions contained in sections 12, 13, or 215 of Title 17 of the *United States Code*, or, in the case of published three-dimensional works of art, there has been compliance with section 202.8 (b) of the regulations of the Copyright Office, published in the Code of Federal Regulations, 1949 Edition, which provides for the deposit of identifying reproductions in lieu of the work itself. To distinguish foreign works, for which two copies have been deposited under section 215 of Title 17 of the *United States Code*, a zero immediately following the class symbol in the registration number has been used.

For a more complete description of the contents of this issue of the *Catalog* see p. vii.

Orders, payable in advance, for all parts of the *Catalog of Copyright Entries* should be sent directly to the Register of Copyrights, Library of Congress, Washington 25, D. C. Orders may be placed for individual issues, as subscriptions for one or more parts or for the complete *Catalog*, and for periods of one or more years. All orders should state clearly the title and the inclusive dates of the part wanted. Checks or money orders should be made payable to the *Register of Copyrights*.

The Copyright Office welcomes inquiries, suggestions, and comments on the content and organization of the *Catalog*. Such communications should be addressed to the Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington 25, D. C.

HOW TO USE THE CATALOG OF COPYRIGHT ENTRIES, PART 5B

Unpublished Music (Part 5B) lists unpublished music currently registered in Class E, and each registration is described in a main entry. Part 5B consists of two sections. The first is a list of main entries arranged alphabetically under the titles which appear at the beginning of the entries. Interfiled with the main entries are entries for variant titles and for the titles of the works from which excerpts are taken. In each case, the cross-reference refers the searcher to the title under which the main entry can be found. The second section is an index to the names of the composers, authors, claimants, etc., which are given in the main entries. Included in the index are cross-references from nicknames, pseudonyms, etc.

Each main entry contains the following information descriptive of the work, if available and applicable:

1) Title. If the piece is an excerpt, the title of the work from which it is taken is also given.
2) Names of the authors as they appear in the copy of the work and in the application, each preceded by the appropriate designation, i. e. "w" (words by), "m" (music by), "arr" (arranged by), etc.
3) Name of the employer in case of a work made for hire, if so named in the application, together with the names of the employees.
4) Information contained in the application which relates to the registration of an earlier version of the work.

The fullest available form of each name is used, and the real name, if known, is used in preference to the nickname or pseudonym.

Information relating specifically to the claim of copyright is preceded by the copyright symbol © and includes:

1) A brief statement relating to the specific part of the work to which the claim is limited when this information is given in the application.
2) Name of the copyright claimant.
3) Day, month, and year on which the last of all the items required to complete registration (i. e., each of the following: application copy, and fee) was received in the Copyright Office.

When the authors and claimants are the same, data about authorship and copyright claim are combined in one statement to avoid repetition.

Illustrative examples of typical entries are given below.
